Ethernet Network Service

Any-to-any connectivity for high data traffic locations.

Ethernet Network Service enables customers to connect physically distributed locations across a Metropolitan Area Network (MAN) as if they are on the same Local Area Network (LAN). The service provides Virtual Local Area Network (VLAN) transparency and enables customers to implement their own VLANs without coordination with Comcast. It's also a cost-effective alternative to traditional hub and spoke network topologies, offering a more flexible and scalable network solution.

Ethernet Network Service Features

Any-to-Any Connectivity
Any site can send traffic to, (and receive traffic from), any other site within the network through a single Ethernet interface.

VLAN Transparency
VLAN configurations can be changed within the network without the need to coordinate with Comcast.

Flexible, Fully Scalable Solutions
Available in 3 Class of Service (CoS) options, with symmetrical dedicated bandwidth configurable from 1Mbps to 10Gbps.

Safe, Secure Connection
Bypass the public Internet and transfer data safely and securely over our network, where your traffic is masked with a unique customer ID.

Web-Based Reporting
Connectivity statistics are available for the previous day, seven-day or thirty-day period, and can be viewed through a secure web portal.
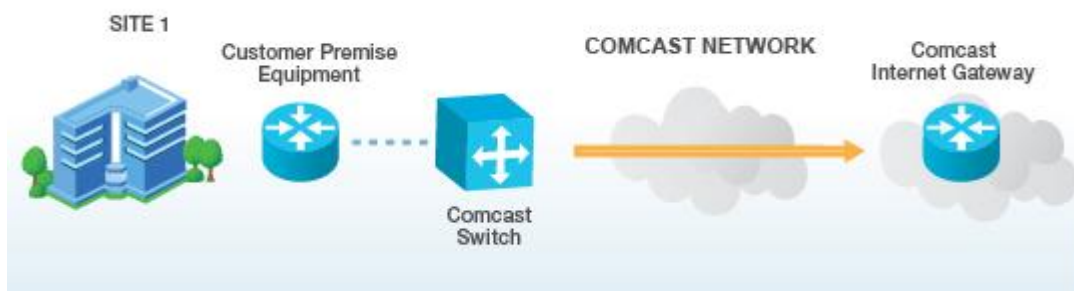

Business Class Support
Our Enterprise customers receive 24/7 priority Business Class support from an experienced dedicated local account team led by an Enterprise Account Executive which consists of technical and service specialists. Additionally, services are monitored 24/7 by a dedicated national team through our Business Class Network Operations Center (NOC).

 MEF 9 and MEF 14 Certified

Ethernet Dedicated Internet

Secure bandwidth for increased efficiencies.

Designed for organizations needing more bandwidth and a highly secure, dedicated connection between their existing Local Area Network (LAN) and the public Internet, Ethernet Dedicated Internet provides an Ethernet Virtual Connection (EVC) from the customer's location to a Comcast Internet Point of Presence (POP) router. Our Ethernet interface enables true plug-and-play compatibility with your LAN.

Ethernet Dedicated Internet Features

Symmetrical Connectivity
Symmetrical dedicated Internet bandwidth, configurable from 1Mbps to 10Gbps through Class of Service (CoS) options.

IP Addresses
Static IP addresses assigned based on American Registry for Internet Numbers (ARIN) guidelines and customer justification.

Domain Name System (DNS)
Includes primary and secondary DNS service – Comcast will assist customers in transferring existing domain names.

Border Gateway Protocol (BGP) Routing
Optional BGP setup to facilitate multi-homing among multiple ISP networks.

Business Class Support
Our Enterprise customers receive 24/7 priority Business Class support from an experienced dedicated local account team led by an Enterprise Account Executive which consists of technical and service specialists. Additionally, services are monitored 24/7 by a dedicated national team through our Business Class Network Operations Center (NOC).

Pricing Proposal

Option One: Deliver 30 Mbps Ethernet Dedicated Internet Service to the following site:

Westmont Police Department

Contract Term	Monthly Recurring Charge	Non Recurring Charge
5 Years	$ 1400	$ 0

Option Two: Deliver 40 Mbps Ethernet Dedicated Internet Service to the following site:

Westmont Police Department

Contract Term	Monthly Recurring Charge	Non Recurring Charge
5 Years	$ 1550	$ 0

Our Customers

Comcast customers enjoy the speed, value and choice of customized solutions that make us a leading provider of broadband services. Our core markets include:

- K-12 and Higher Education

- Health Care

- Government

- Commercial

- Communications Providers

Education, Health Care, Government, Commercial and Communications customers benefit from the broadband technology delivered by Comcast services. Our customized network solutions will bring their vision and goals to life by enabling increased operational performance and bottom-line results.
